

Claims:

I claim:

1. A seating device, comprised of mineral or masonry composite material.
2. A seating device as recited in claim 1 for supporting said user.
3. A seating device as recited in claim 1 with upright supports appropriate to the desired height of said user.
4. A seating device as recited in claim 1 that receives an electric heating element that supplies heat to keep said user more comfortable in colder temperatures or climates.
